

# vidubiology Conference Sofia 2018

20th June 2018, 9.30 hrs – 15.30 hrs, 32nd SU "Sv. Kliment Ohridski", Sofia, Bulgaria

A warm welcome to the vidubiology Conference in Sofia! vidubiology is all about the creative use of video within the Biology classroom – to help learning processes by allowing learners to discover and explore biological phenomena from another perspective, using techniques of photography and video.

We have prepared an interesting day for you that will show you what vidubiology is all about. It will include expert talks and workshops on:

- Thoughts and ideas on current issues in biology learning, from biology experts
- Learn about the use of video in the classroom, from video experts
- See some basic video projects and get involved
- Connect with colleagues from Sofia and across Europe

We are looking forward to meeting you at the Conference,

*Armin Hottmann*

vidubiology Project Coordinator
